## (54) PICTURE COMPRESSION METHOD

## (57)Abstract:

PURPOSE: To provide the picture compression method capable of natural reproduction to be used for the picture transfer in a video telephone, remote monitoring system or in a remote control system.

CONSTITUTION: The picture motion is detected by a motion detection part 9. On the other hand, the number of missing frames is decided by a missing frame control part 4. When the motion is more rapid than the prescribed reference and the number of missing frames is more than the prescribed value, the sub sample is taken as an add-numbered or even-numbered field, and taken as an add-numbered or even-numbered line in the case of a small number of missing frames.

## LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
